## 1. The Mission

***One day, a long time ago, alien-like creatures called Terans ruled the Earth. They lived in peace, happily eating carrots. But this peace would not last long. One day, Satans arrived. They started taking pesticides and harming the Terans with them. The casualties were skyrocketing. They needed to do something about this. In their base, the only Teran strong enough to tackle the ruthless beings was Shinsei, a.k.a. The masked ninja. The first task that was assigned to him was to get a sample of the pesticides used in harming Terans.***

## **2. Getting the sample**

***“I accept the mission” Shinsei said. Professor Teran said he needed the formula from the pesticide to make an antidote so that when they need to help Terans being affected by the pesticide, a cure is readily available. Without a word, Shinsei was teleported to a nearby Satan home to get the sample. Once teleported, he immediately began planning. First, he climbed all the way up to the roof of the house. Then, he connected a strong rope to the chimney. He rappelled down to the floor of the house. He quickly found a locker where the pesticide was kept. He took a small sample, put it in his case and was about to escape, but heat sensors detected his presence. He quickly climbed out of the chimney and leaped off the roof of the house. In mid-air he got teleported back to the ship.***

### **3. The antidote is formulated**

***“This is the sample”, Shinsei said to the professor. “Ah, good work”, said the professor.***

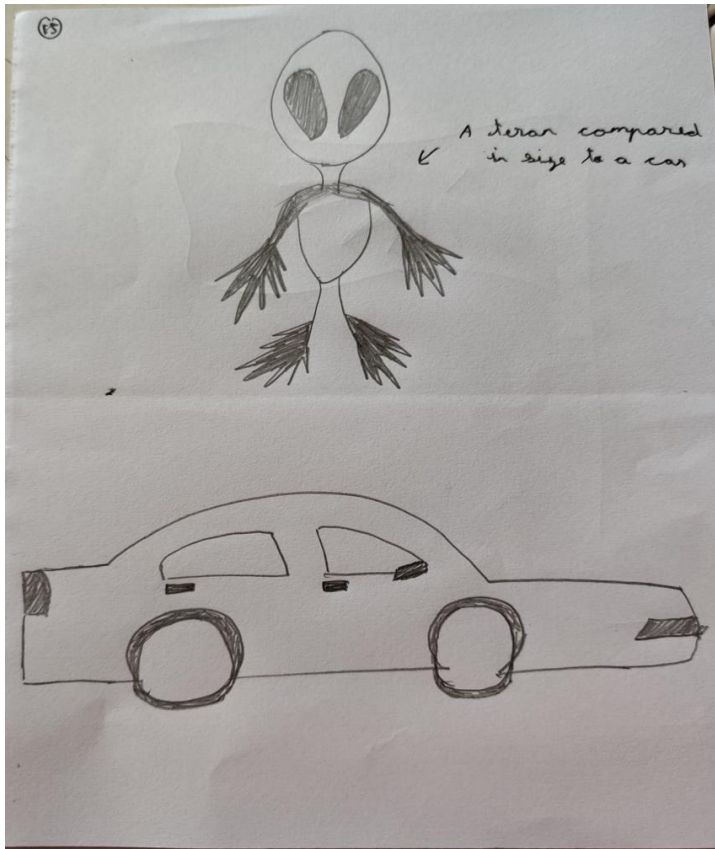

***He began analyzing the chemical compound of the pesticide. He took it to his experiments lab and began testing for weaknesses and soon found out a solution. He noted down a list of things needed for the creation of the antidote. He gave the list to Shinsei and told him that he must get enough of these to make antidotes for the rest of the species. Shinsei then told his agents around the world to get these ingredients and give them to him. Meanwhile, Shinsei was also going to get some more for the professor to analyze, make and test the antidote on an already affected Teran.***

#### **4. Stealing the ingredients**

***So, again, Shinsei was teleported to the place that had the first ingredient, alcohol.***

***The nearby brewery was the perfect place to get some. So he climbed onto the roof of the brewery. Surprisingly, there was a gun on top and it started shooting tranquilizer darts at him, but he dodged the darts and disabled the gun silently. He then snuck in through the ventilators, went to the brewery, took some alcohol and snuck out. The next ingredient on the list was some loganberry juice. There was a loganberry tree nearby, but it was protected by a vicious dragon. Shinsei beat up the dragon, took some loganberries, crushed them into juice and got away. The final ingredient on the list was some milk. Shinsei went to the dairy farm, stole some milk and got away.***

***5. The antidote is made***  
***“Ah, the test material” said the professor when Shinsei came in with the ingredients. When the professor finished making the antidote, he tested it on an already affected patient. The results were amazing! The antidote had worked. Meanwhile, Shinsei’s agents around the world were delivering the ingredients to the delivery centre at the Teran base. Then, the professor took his army of factory robots, took the ingredients from the agents and started to make antidotes for the rest of the Teran species.***

### **6. The Evacuation**

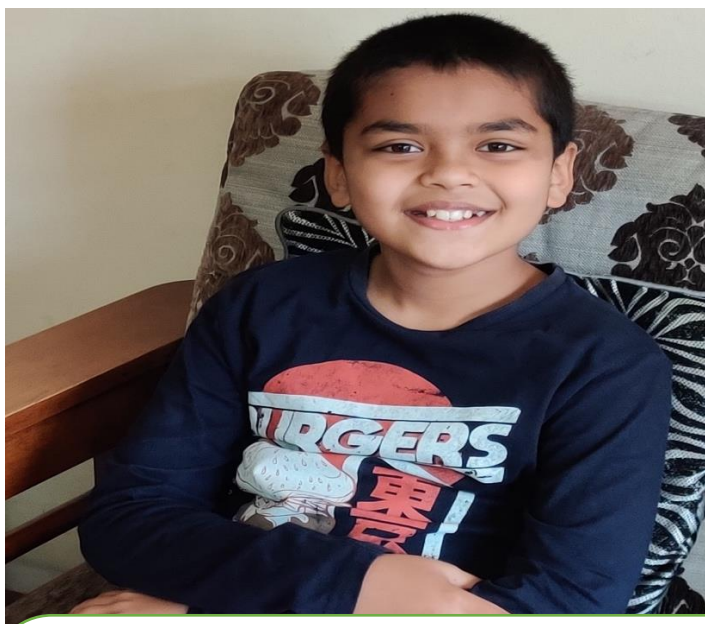

***The professor told Shinsei that his final mission was to get a carrot so that the professor could analyse it and replicate it with his army of factory bots. Shinsei then teleported to the farm where carrots were and started thinking about how to get in. The fence was 500 mtrs tall so Shinsei's rope was too small to climb the fence. But suddenly, it hit him! He could easily dig a hole under the fence, make a tunnel and get to the other side. So, he started digging. After some time, he reached the other side, quickly stole a carrot and teleported back to base. Now that the Terans had everything they needed, they relocated to another planet while the Satans used up all of Earth's resources and were eventually led to extinction.***

***The End***

### **About the author**

**(by Subhashchandra .B. Adhav)**

***Vedarth is a voracious reader. He has a good grasp of things. Moreover, he has a nice thinking capacity. His writing reflects his in-depth thinking. His vocabulary is strong and in addition, he has a skill to choose appropriate words. His precise choice of words makes his writing a good read. Being a versatile writer, he can write effectively on varied topics and themes. He is a notable and budding writer and he can scale new heights in the near future. I wish him the best on his endeavours in the literary field.***

#### **Blurb**

**Terans live happily on Earth. Satans arrive and attack Terans. Peace is destroyed. Watch, as Shinsei the Teran comes to the rescue in.....**  
**The Masked Ninja: Invasion.**
