## The Haunted Island

My younger brother and me were coming back from school with our permission forms to go to an island to learn about life on an island.

The new chapter we started in Social studies. Me and my brother absolutely loved the lesson so we were quite happy about the field trip. When we reached home, we asked our Mom and Dad if we could go?

And to my surprise they actually agreed and signed it. After they signed it, they told me to look after Hitin my younger brother and I replied yes, I will look after him

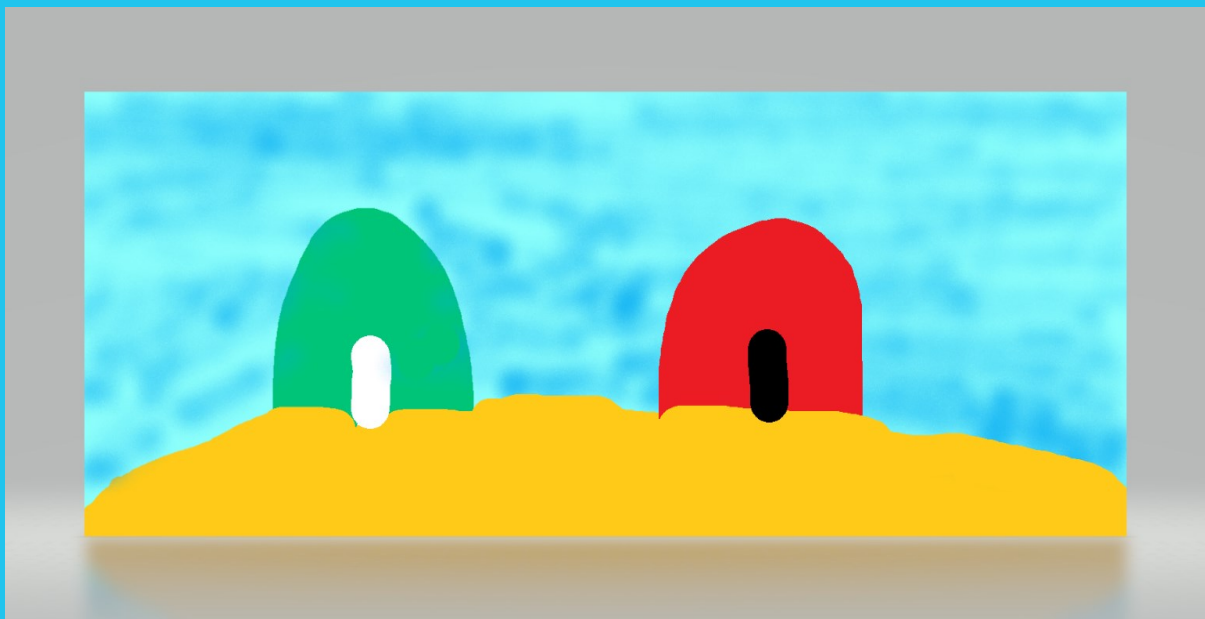

and I will make him sleep next to me.

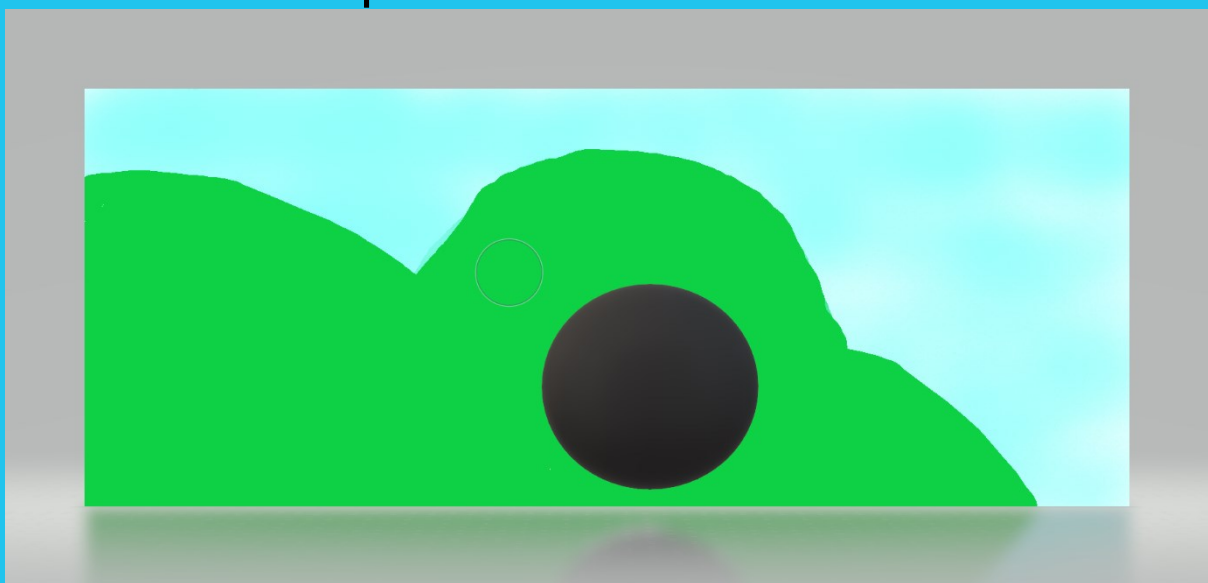

The next day we left our house at 6 AM and reached the school on time, our bus left at 6:30 AM sharp. 30 minutes later we got on the bus and went to the harbour.

One hour later we got off the bus, and switched to our boat they told that it will take 1 hour to go to the island so we ate our snacks and sat, some people slept but Anurag, Hitin and me stayed up and talked about our stay for about 30 minutes and then yuvahari also came to talk to us this time we had been talking and playing games for 30 minutes and I got bored so I

started looking out of the window, we were almost there just 3 minutes to go, I saw the most vibrant water colour even I was so surprised I became speechless for one minute then I told them to look out and then we all became speechless then the captain told us we will be docking shortly and then we docked and got down. Our teacher asked us to set up our tents.

We finished setting up our tents and while we were setting it up Aarush came to me and asked if he can sleep and play with us and I said yes. We set up our tents and went hiking on the mountain on the island well I wouldn't say a mountain it was a hill. So, we climbed up and found a cave.

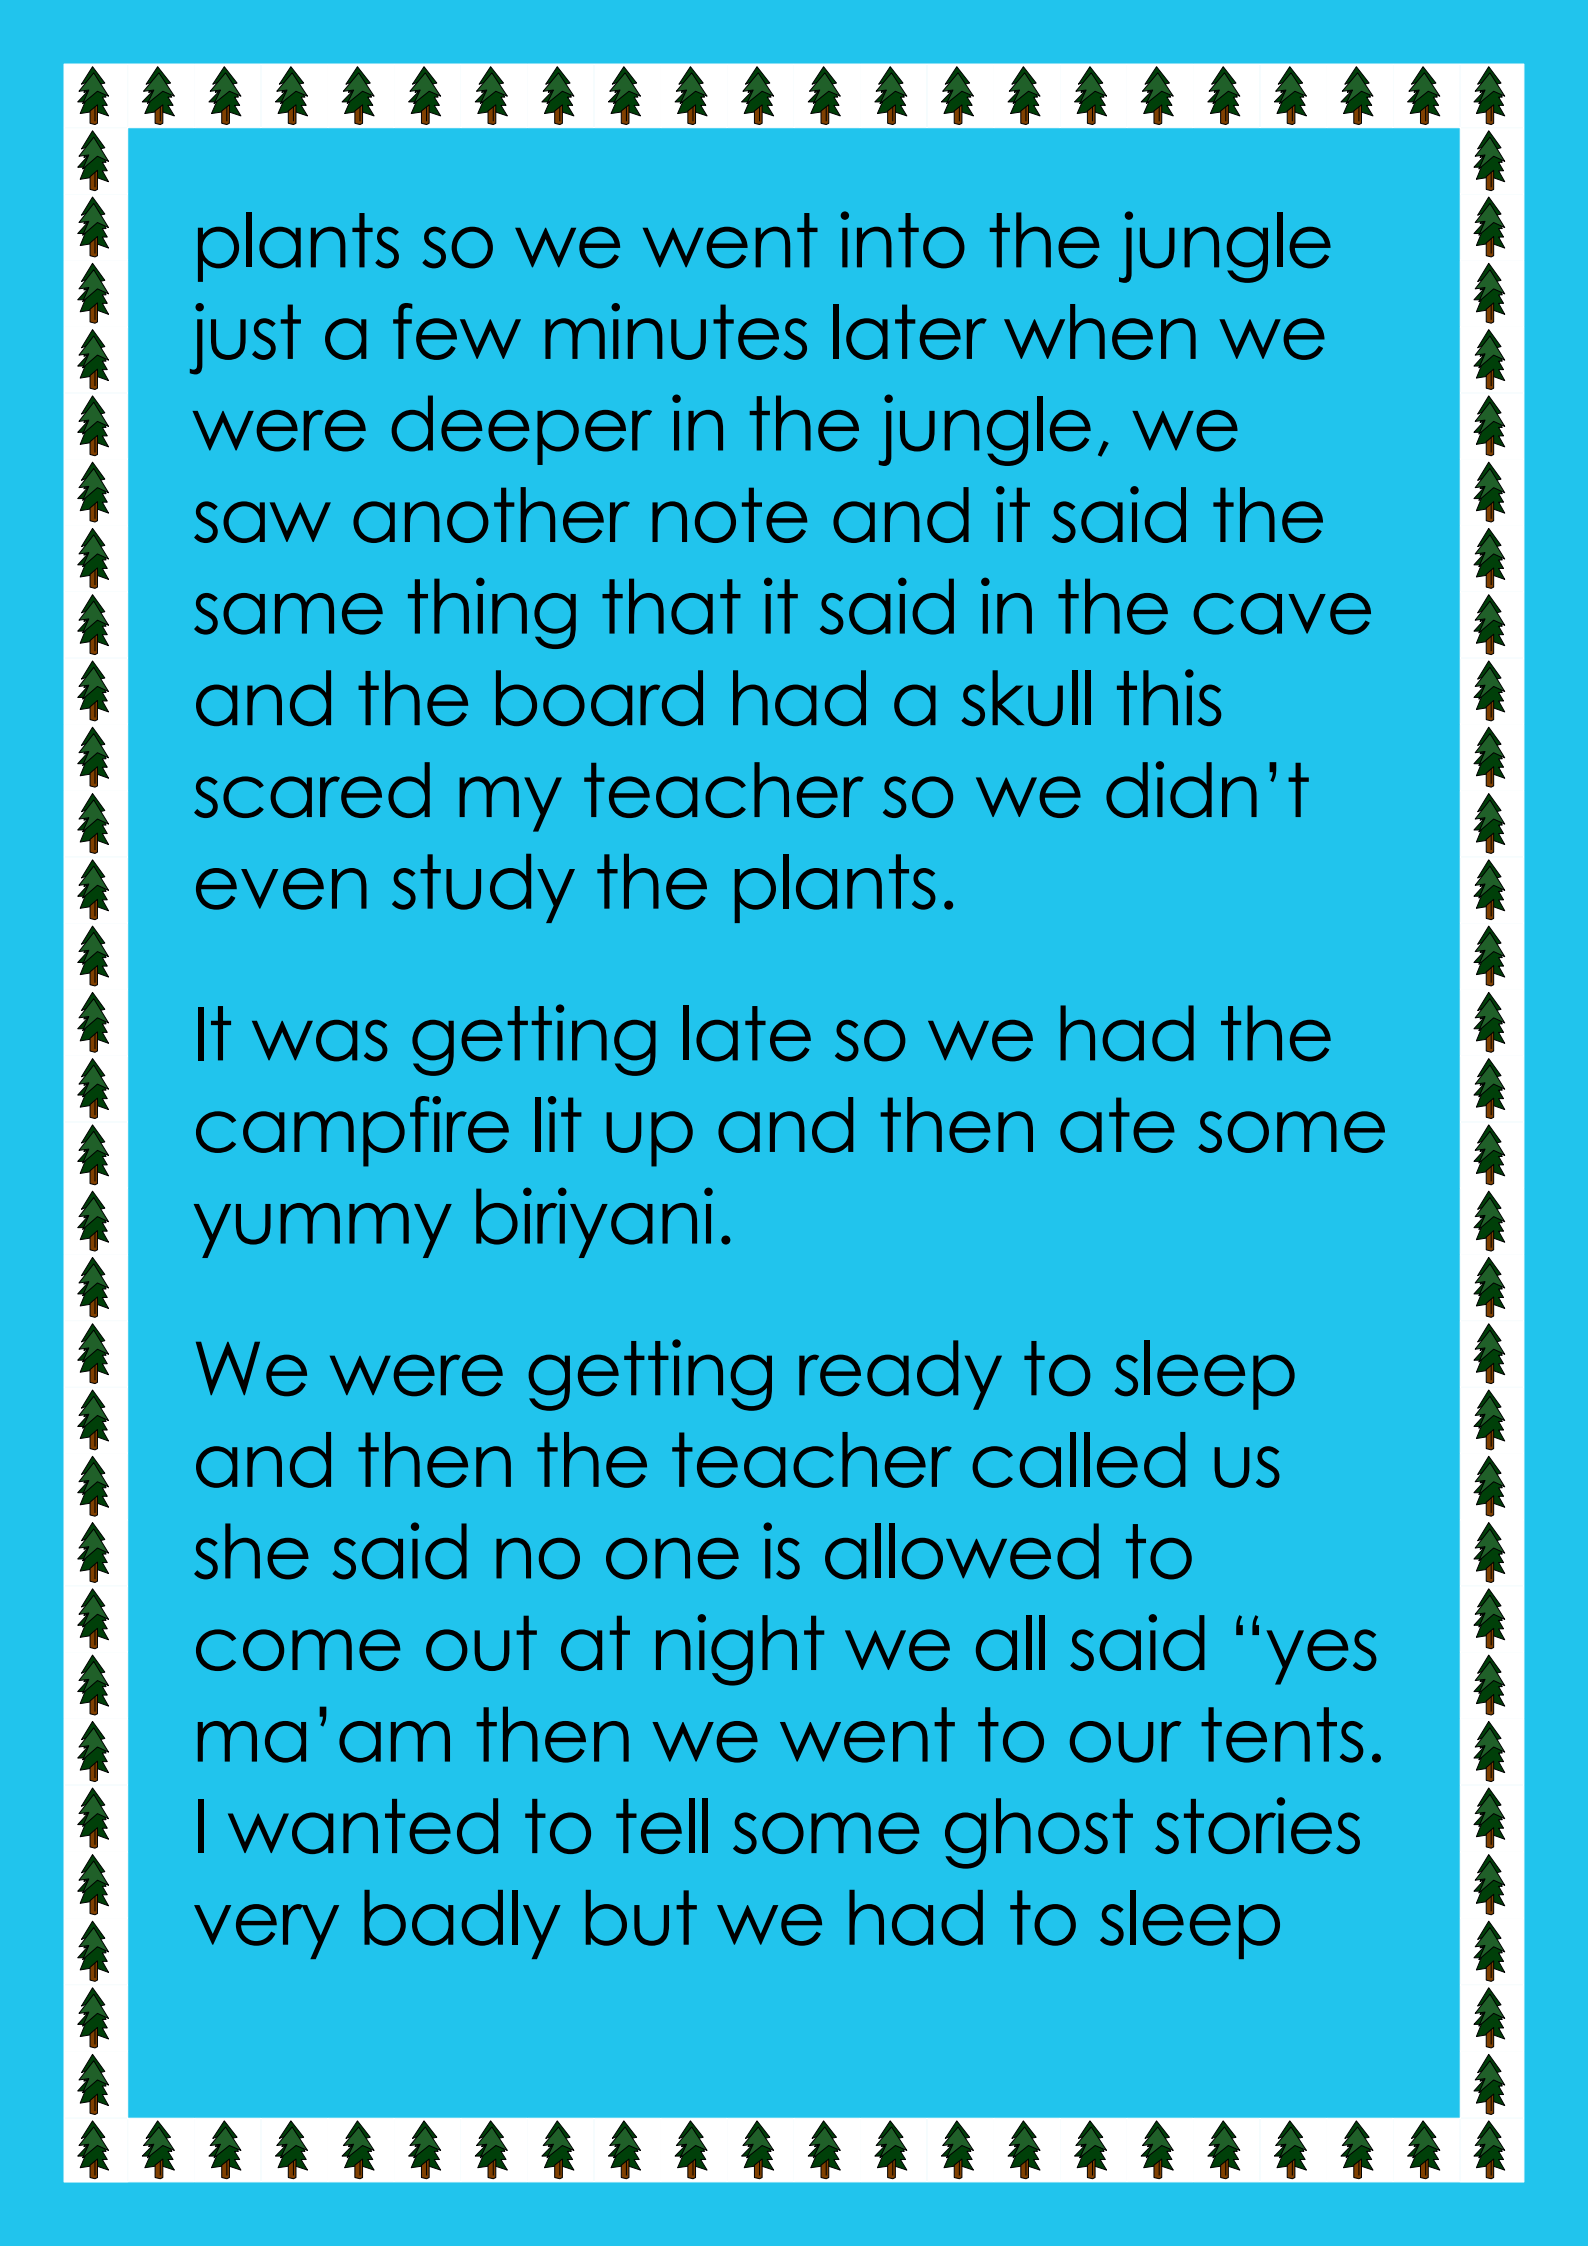

We went inside with our flashlight's and found a note written in blood and this is what it said.....

## Keep out

We all read the note and after we read it, we felt someone passed behind us we looked back, nothing then we started looking in the surroundings of the note I found a book and no one found anything. Some people must have gotten scared by now but we did not so we spent the next one minute talking about what we are going to do at night, and then while we were discussing our teacher told us it is time for lunch so we head back down and ate lunch we all ate pasta and garlic bread for lunch. After lunch we went to learn about wildlife and

plants so we went into the jungle just a few minutes later when we were deeper in the jungle, we saw another note and it said the same thing that it said in the cave and the board had a skull this scared my teacher so we didn't even study the plants.

It was getting late so we had the campfire lit up and then ate some yummy biriyani.

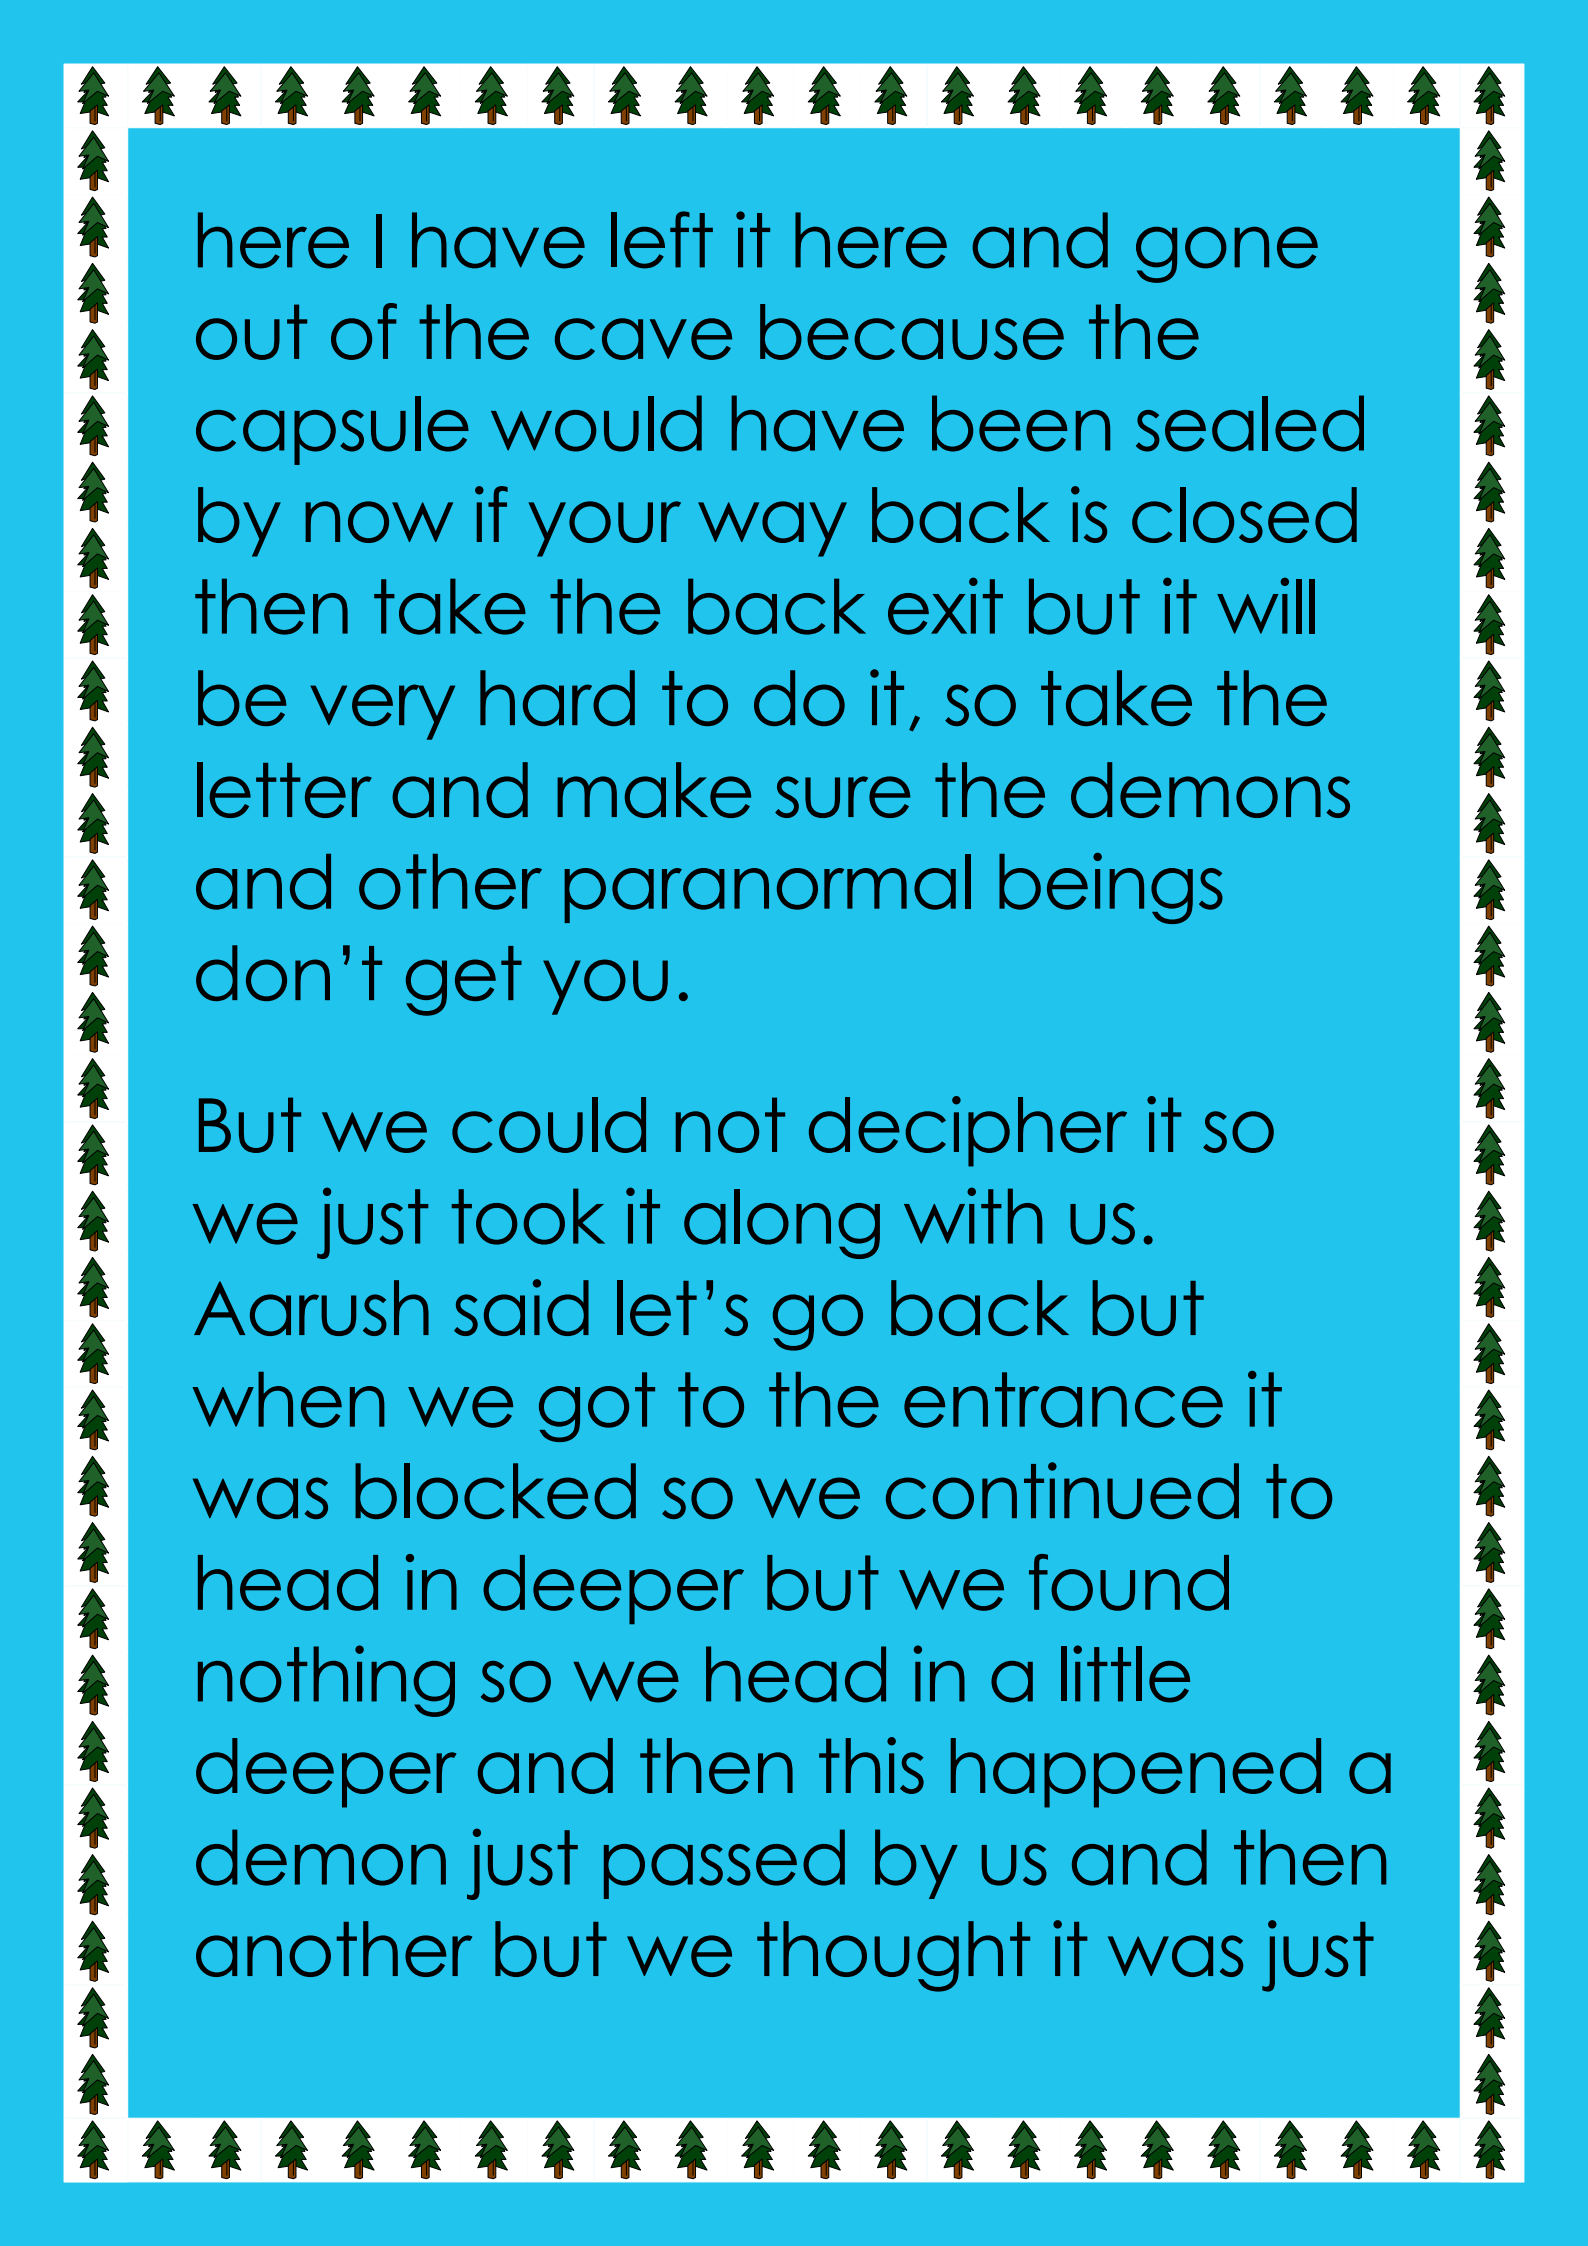

We were getting ready to sleep and then the teacher called us she said no one is allowed to come out at night we all said "yes ma'am then we went to our tents. I wanted to tell some ghost stories very badly but we had to sleep

because we were going to wake up at 3 a.m. to explore the cave.

So, we woke up at 3:04 and got our flashlight's and wore our jackets. Then we started to hike up the hill took us about 15 minutes to do so. After we reached the top of the hill we started to head into the biome. A few seconds later we found the sign and after we found it Yahaira told let's head deeper and that is what we did we went in deeper and found another note this time it was not on the wall it was a letter so we looked to see what the note was and it was ....those who ever finds this letter will be safe from the demons that spawn

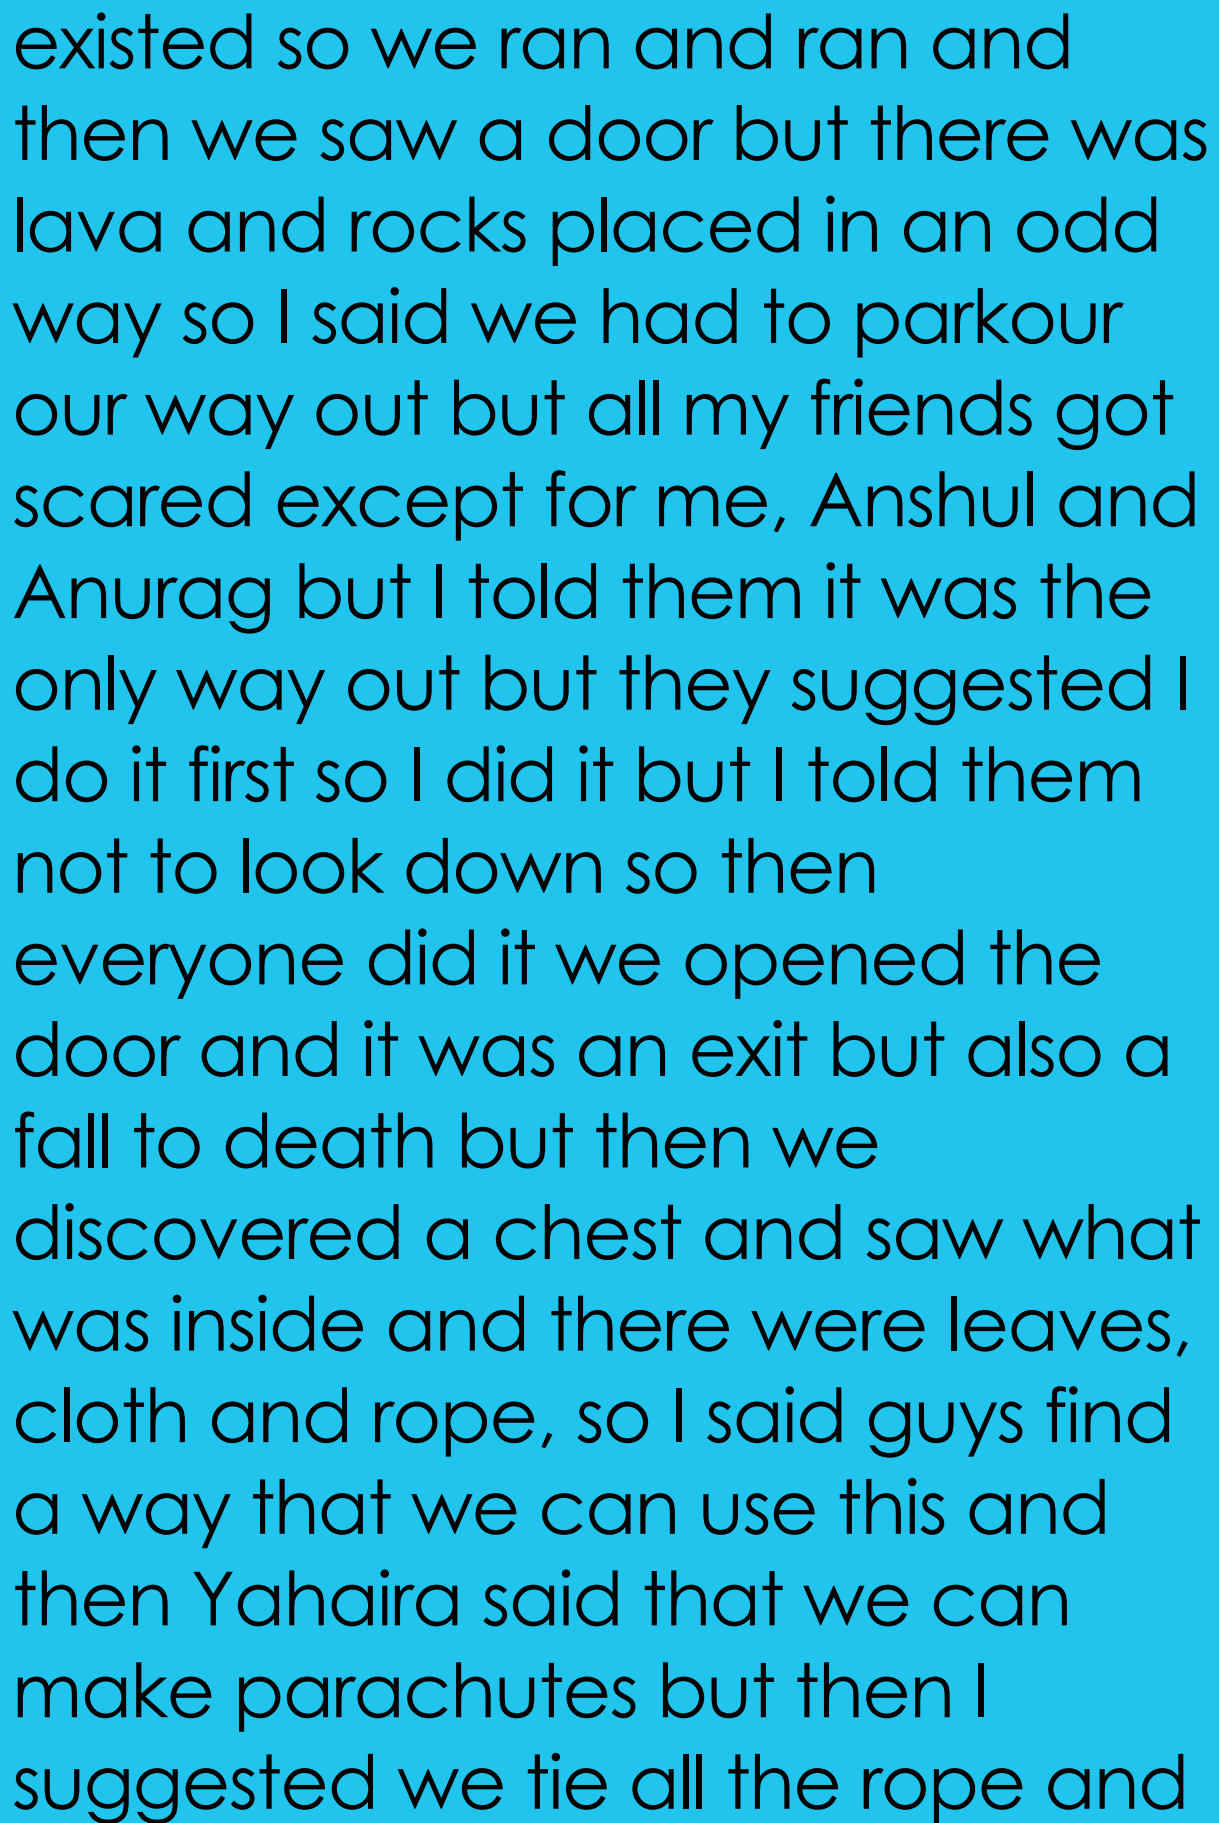

here I have left it here and gone out of the cave because the capsule would have been sealed by now if your way back is closed then take the back exit but it will be very hard to do it, so take the letter and make sure the demons and other paranormal beings don't get you.

But we could not decipher it so we just took it along with us. Aarush said let's go back but when we got to the entrance it was blocked so we continued to head in deeper but we found nothing so we head in a little deeper and then this happened a demon just passed by us and then another but we thought it was just

hallucination but we were wrong. Then we seemed to have seen a demon standing right in front of us so we got so scared that we ran deeper in to the cave but little did we know what would happen next.

A demon came and touched Hitin and he screamed and we turned back we saw nothing, but then again when we turned back, we saw it. Hitin and Anshul fainted but the rest of us did not. Now it was confirmed that demons

existed so we ran and ran and then we saw a door but there was lava and rocks placed in an odd way so I said we had to parkour our way out but all my friends got scared except for me, Anshul and Anurag but I told them it was the only way out but they suggested I do it first so I did it but I told them not to look down so then everyone did it we opened the door and it was an exit but also a fall to death but then we discovered a chest and saw what was inside and there were leaves, cloth and rope, so I said guys find a way that we can use this and then Yahaira said that we can make parachutes but then I suggested we tie all the rope and

rappel down but there wasn't enough rope so we went with uakari's idea and it turned out very well.

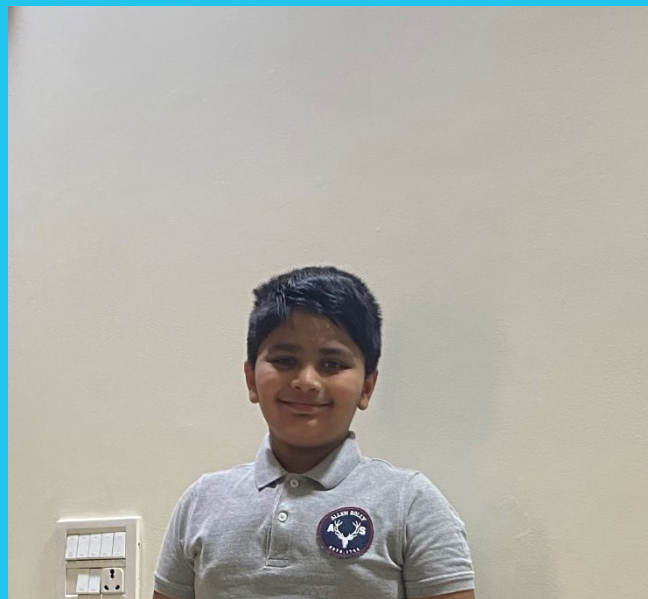

No one wanted to try it first so I did it and it worked so then they all jumped and landed safely. It was almost becoming morning so I told my friends lets go back to the tent and we reached safely got into our tent and slept. Then our teacher came and then she told we were leaving in half-an hour so we brushed our teeth took bath

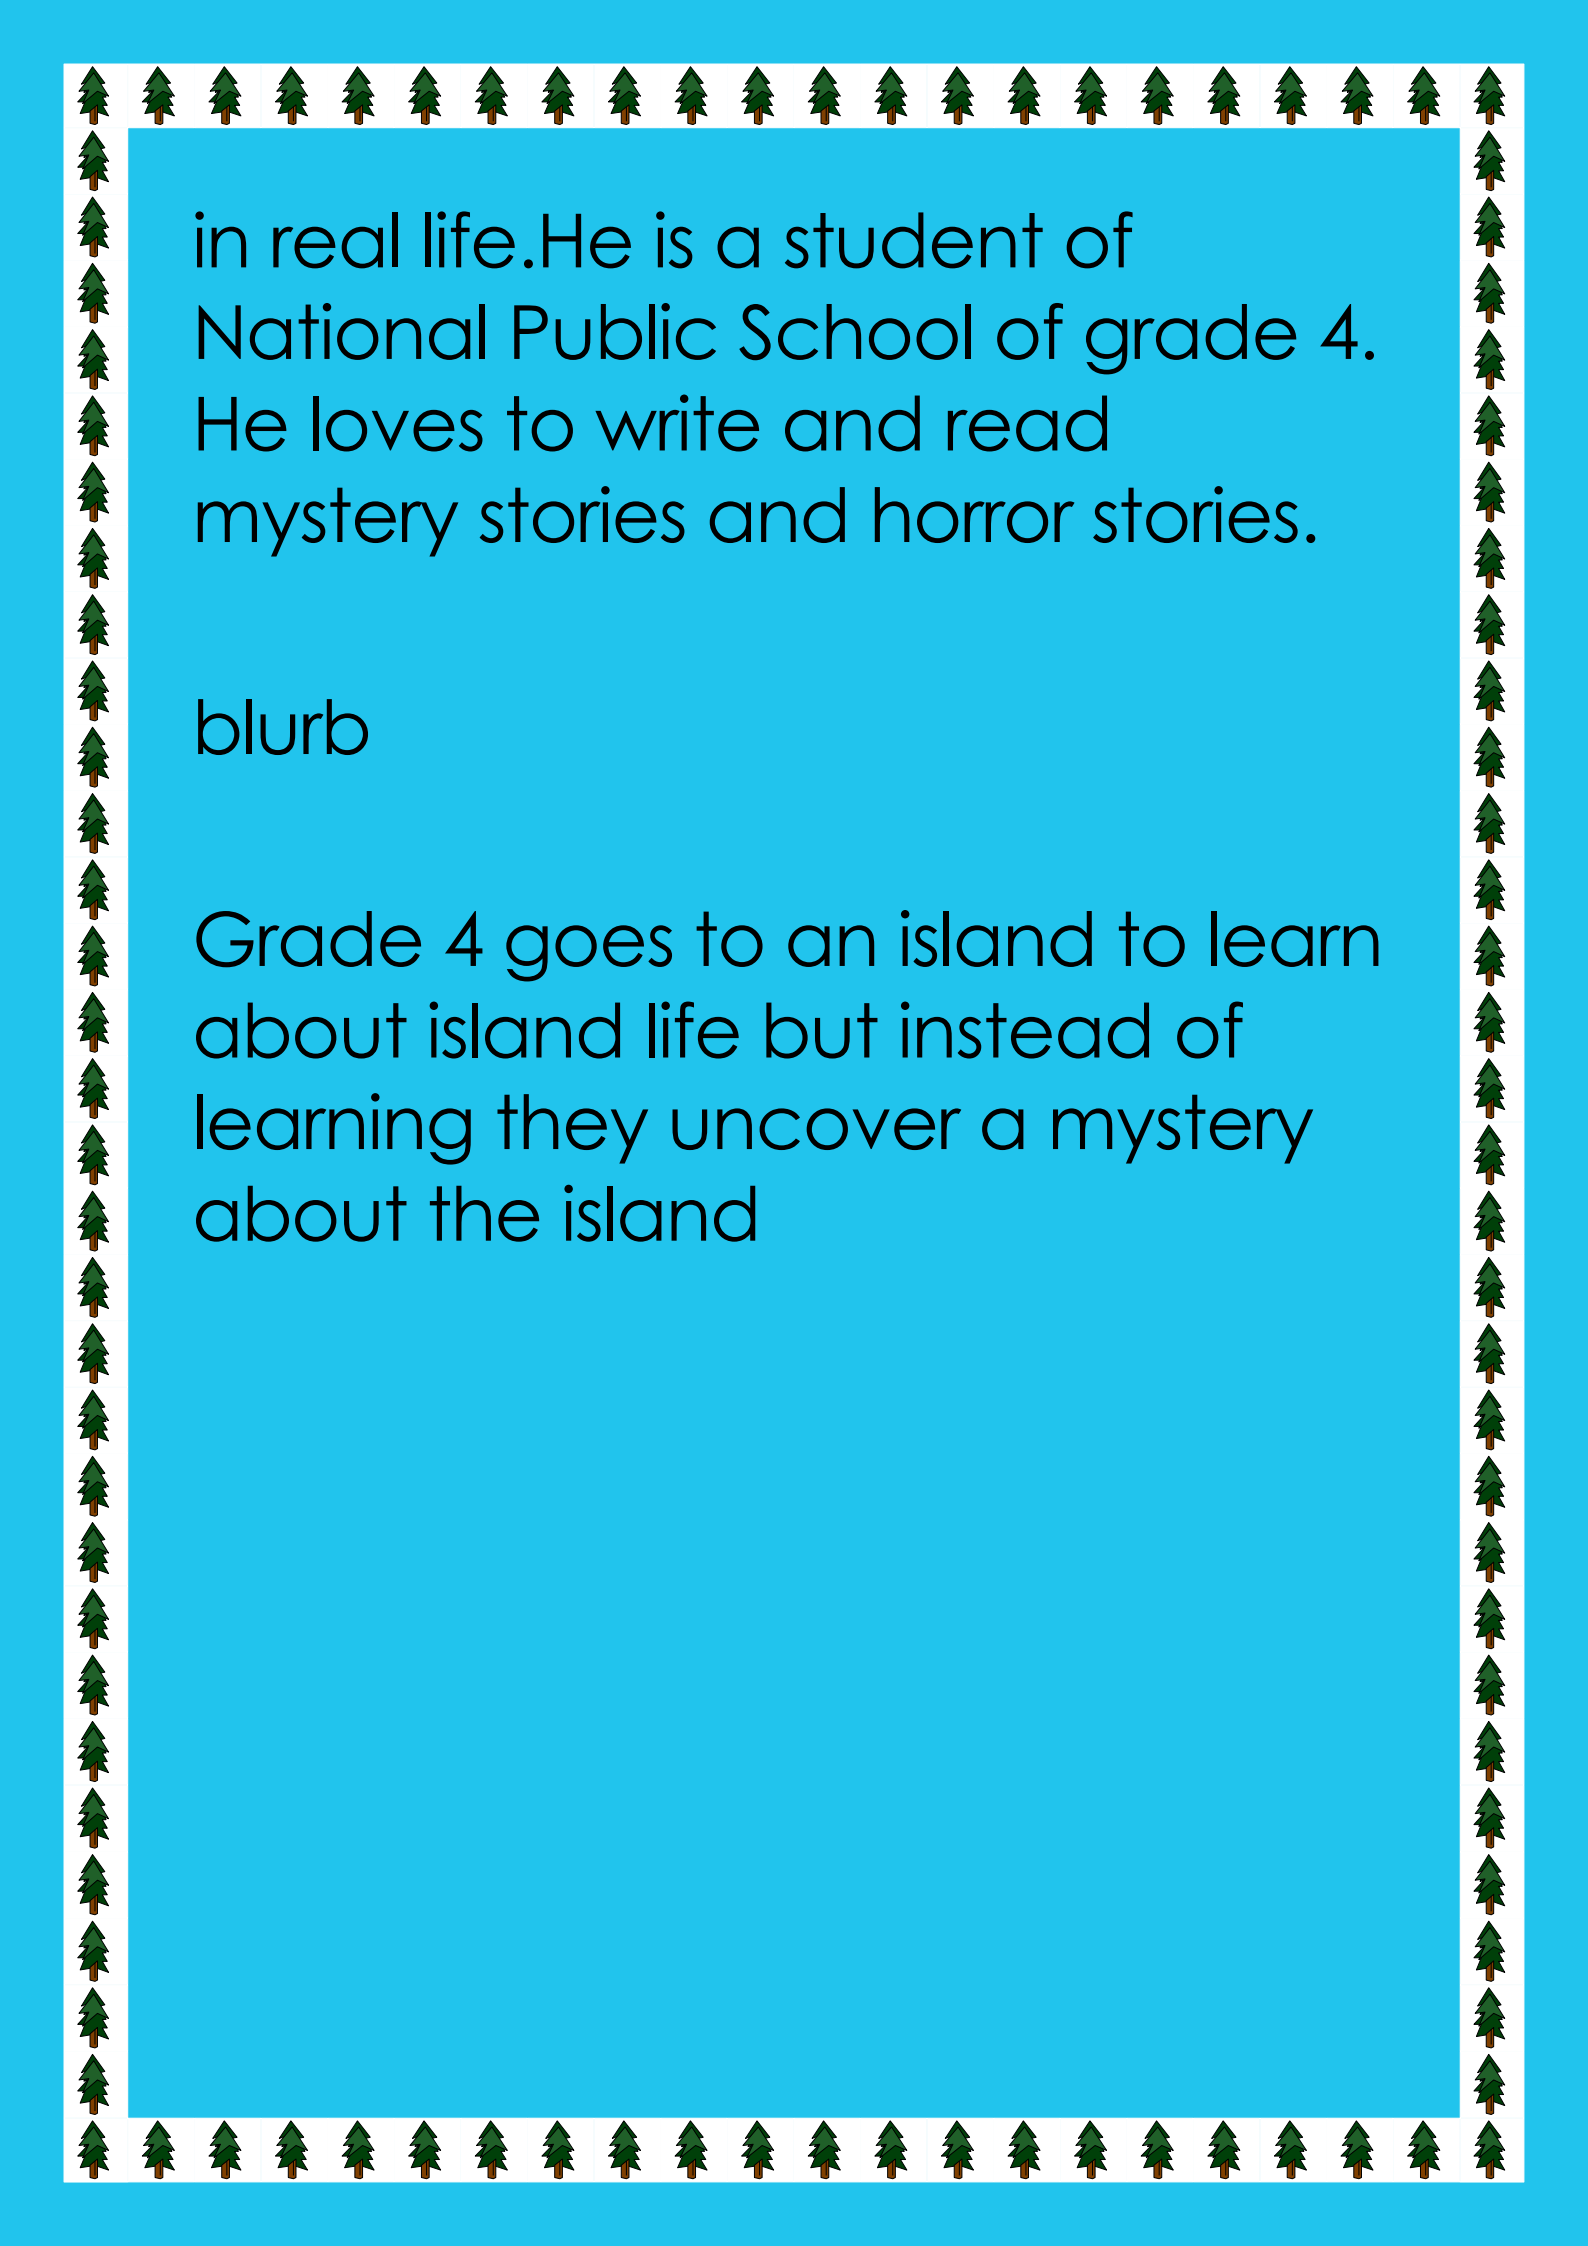

packed our tent, ate and had a normal day.

The end.

## ABOUT THE AUTHOR

Daivik is a budding author he likes to write mystery stories and horror stories. He is a clever, fearless boy

in real life. He is a student of  
National Public School of grade 4.  
He loves to write and read  
mystery stories and horror stories.

blurb

Grade 4 goes to an island to learn  
about island life but instead of  
learning they uncover a mystery  
about the island
